MANAGED MAC SERVICES

FROM ALL COVERED

Managed Services for your Apple investments.

Today's worker is demanding. Not driven by ego. But by passion. They know what they need to get the job done and expect the work environment to provide nothing less. Many organizations and institutions have adopted Apple technology as part of business, designed to support the dynamic workplace that embraces technology professionals are already familiar with and love to use. Apple is a popular platform for today's business and is the preferred choice for many professionals in the workforce.

Many IT teams do not have the time, resources, or mandate to add Apple management and security capabilities to their skillsets. They need a simple, affordable solution to outsource the total lifecycle management of Apple devices in their environments.

All Covered has the tools to get that done. With Managed Mac, we can handle the design, configuration, security, management, and support of your Apple platform, in an all-in-one, easy-to-access program.

All Covered's dedicated engineers visit and assess your site, document your environment, make recommendations, and lead the optimization of systems. When finished, manual processes are automated and Apple products are optimized for the network.

All Covered ensures that the Apple products are fully compliant endpoints, functioning efficiently in the organization.

The result is a better, streamlined experience for both IT stakeholders and employees. With nearly 20 years of deep expertise on the Apple platform, All Covered can cover all aspects of your deployment, from end user to admin, from Mac to iOS, from management to security, all for a single, easy, all-encompassing per-device monthly fee.

Any Apple supplier can supply the products. But, All Covered understands that it's more than that. Managed Mac can help overcome specific challenges and manage your Apple investment seamlessly and professionally.

MANAGED MAC CAN BE CUSTOMIZED TO FIT YOUR NEEDS

- Apple support desk
- iOS devices such as iPhone and iPad
- Mobile device platform management

EVERY MANAGED MAC CUSTOMER HAS:

- A dedicated technical manager
