TRAIN YOUR FACULTY

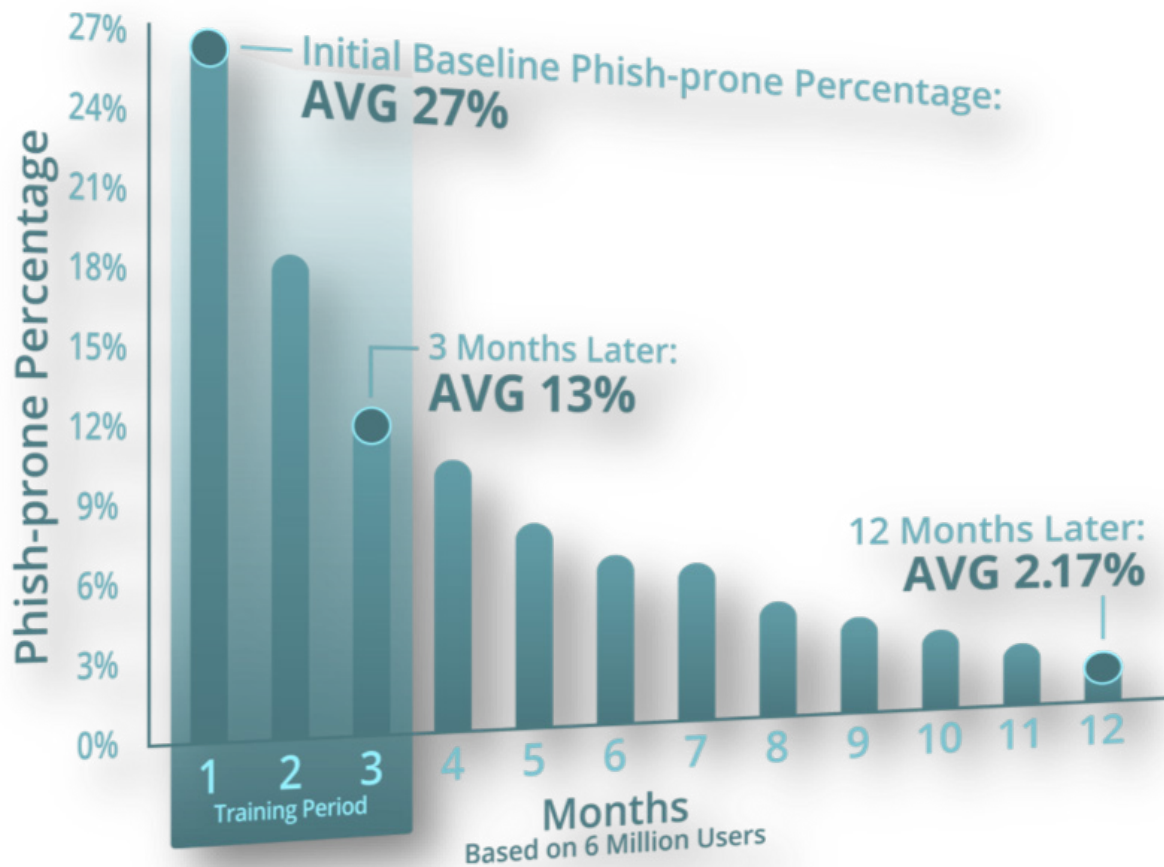

All Covered Security Practice will on-board & manage your Security Awareness Training program:

- Deploy and deliver monthly phishing emails to faculty
- Deploy and deliver monthly security hints and tips to users
- Deploy and deliver quarterly security awareness training sessions
- Deliver Monthly Maturity Assessment
- Schools will be assigned a security analyst from Security Operations Center (SOC) to manage program and ensure success
- Specific user training available for repeated failed phishing test

WHAT ARE THE BENEFITS FOR YOUR SCHOOL?

- Reduced Malware Infections
- Increased Faculty Productivity
- Prevents possibility of leaked student info
- Reduced Data Loss
- Users Have Security Top of Mind
- Meets compliance needs

Generating Industry-Leading Results and ROI

A SUCCESSFUL SECURITY AWARENESS TRAINING PROGRAM WILL EDUCATE YOUR TEAM BY:

TRAINING. Use on-demand, interactive, and engaging computer-based training. Awareness modules and videos educate users on how a phishing or social engineering attempt could happen to them.

TESTING. Start with baseline testing of your entire user base. Additional testing at least once a month, test your staff to reinforce the training and continue the learning process. Train a mindset and create new habits. Simulated social engineering tests at least once a month are effective at changing behavior.

MEASURING RESULTS. Have the ability to report on the training and testing of the users. Track how your workforce responds to both training and phishing.
