

KONICA MINOLTA

All Covered

IT SERVICES FROM KONICA MINOLTA

CMMC ACCREDITED PROVIDER

Offering Stronger Compliance and Security Requirements for Contractors

All Covered is an accredited registered provider preparing Defense Supply Chain (DSC)/Defense Industrial Base (DIB) Contractors and subcontractors for the Cybersecurity Maturity Model Certification (CMMC). The CMMC is intended to serve as a verification mechanism to confirm appropriate levels of cybersecurity practices, processes and capabilities.

This verification ensures an adequate level of cyber hygiene is met by the DSC/DIB to meet the recommended standards of the Department of Defense, as well as ensuring the protection of Federal Contract Information (FCI) and Controlled Unclassified Information (CUI).

CONSULTING SERVICES

- Translating complex CMMC practices, processes and capabilities into simple to deploy intuitive IT infrastructure and IT security solutions
- Scope the flow of FCI and CUI as defined by the Department of Defense (DOD)
- Create Policy, System Security Plans and Resources to help with CMMC Maturity preparation and implementation
- Provide preparation and guidance for Organizations Seeking Compliance (OSC) prior to the CMMC Certification Assessment.

ACCREDITED TO HELP MEET GOVERNMENT SECURITY REQUIREMENTS

- DFARS 252.204-7012 requires protection, and safeguarding of CUI
- DFARS 252.204-7019 ensures contractors understand DoD Assessment requirements
- DFARS 252.204-7020 requires contractors to provide the Defense Contract Management Agency (DCMA) with access to its facilities, systems, and personnel when higher-level reviews are required
- DFARS 252.204.7021 introduces the CMMC standard for use as a new verification vehicle

CMMC PROCESS

1. Practice/Control gap assessment against the Standard (CMMC L1 – 5, NIST SP 800-171, etc.)
2. For Level 2 – 5 Create a NIST 800-18 Conforming System Security Plan (SSP) and Plan of Action & Milestone (POAM)
3. Remediate and fill all gaps found in the POAM for L1 & L2 attainment, for L3 to L5 ensure a score of 110 on NIST SP 800-171 assessment, and ensure NIST SP 800-171 score is documented in SPRS
4. Remediate any gaps for full conformance with CMMC L3
5. Observe conformance over a 3 to 6 month period to ensure habitual, and persistent behavior
6. Identify artifacts that prove objective evidence of conformance
7. Introduce you to a C3PAO for your CMMC Assessment

OUR RPO CAPABILITIES

As a Registered Provider Organization, we can have Registered Practitioners, CMMC Certified Professionals and CMMC Certified Assessors that work under our designation as an RPO. Our capabilities are unparalleled even with C3PAOs, as we are not governed by the same restrictions and have a lot of the same information. This allows us to partner with OSCs and prepare them from beginning to end for the CMMC Assessment.

WHY CAN'T AN OSC PREPARE FOR A CERTIFICATION ASSESSMENT USING A C3PAO?

The C3PAO is very limited in the services they can provide to an OSC. They can either provide recommendations or consulting to OSCs or Perform the CMMC Assessment. They cannot do both. Organizations need not only the gap analysis of what they have vs what they need, but they also need the ability to add and update their organizations infrastructure to align with the rigorous new standard. From a cost perspective, an OSC does not want to spend significant time, money and energy to get a certification assessment, and end up empty handed.
